

FADE THE CHALK

POST-MORTEM

Sunday, June 14, 2026

16 Races · 4 Win Picks Hit · Net $-\$29.11$ (−0.9% ROI)

“The model was right. The money was there. The execution gap cost us \$582 in one afternoon.”

Scoreboard

Metric	Value
Races played	16
Win picks hit	4 (25%)
Exactas hit	6
Trifectas hit	4
Superfectas hit	2
Total wagered	\$3,267.20
Total collected	\$3,238.09
Net P/L	$-\$29.11$ (−0.9% ROI)
Biggest win	BEL R7 (+\$646.09)

Metric	Value
Biggest loss	SA R9 (−\$272.00)
Box accuracy — winner in box	12/16 (75%)
Box accuracy — exacta captured	6/16 (38%)

Win picks: BEL R7 (Momentum Files, 9.56/1), GP R8 (Vindicate Cha Cha, 27.2/1), LRL R3 (Bushido, 5/1), SA R5 (Tahini, 17.2/1).

Day saved by: BEL R7 (+\$646), GP R8 (+\$458), BEL R9 exotics (+\$282), SA R5 (+\$374). Four profitable races carried 12 losers.

Where money died: 9 complete shutouts totaling −\$1,656.80. The box caught the winner 75% of the time but couldn't convert to exotic payouts because 2nd/3rd-place horses were often outside the box — lower-ceiling “form” horses beating higher-ceiling “stale” horses.

Model Performance Summary

Track	Race	Wagered	Collected	Profit
Belmont	3	\$186.40	\$59.80	−\$126.60
Belmont	5	\$186.40	\$0	−\$186.40
Belmont	7	\$186.40	\$832.49	+\$646.09
Belmont	9	\$222.00	\$504.40	+\$282.40
Gulfstream	8	\$222.00	\$680.00	+\$458.00
Laurel	3	\$186.40	\$250.00	+\$63.60
Laurel	7	\$222.00	\$0	−\$222.00
Monmouth	5	\$136.40	\$230.30	+\$93.90
Monmouth	6	\$136.40	\$0	−\$136.40
Monmouth	7	\$186.40	\$0	−\$186.40
Monmouth	8	\$272.00	\$0	−\$272.00
Santa Anita	4	\$186.40	\$85.50	−\$100.90
Santa Anita	5	\$222.00	\$595.60	+\$373.60
Santa Anita	9	\$272.00	\$0	−\$272.00
Santa Anita	11	\$222.00	\$0	−\$222.00
Santa Anita	12	\$222.00	\$0	−\$222.00

Track	Race	Wagered	Collected	Profit
TOTAL		\$3,267.20	\$3,238.09	-\$29.11

Commission Card vs. Added Plays

Today's 16 races were not equal. The original Commission Card — 7 picks published to members with full Phase 1-5 analysis, high conviction, clear signals — performed completely differently than the 9 races added afterward for personal action.

	Commission Card (7)	Added Plays (9)
Wagered	\$1,411.60	\$1,855.60
Collected	\$2,326.69	\$911.40
Net	+\$915.09	-\$944.20
ROI	+64.8%	-50.9%
Win picks	3/7 (43%)	1/9 (11%)

Commission Card: LRL R3 (+\$63.60), BEL R7 (+\$646.09), BEL R5 (-\$186.40), LRL R7 (-\$222.00), BEL R9 (+\$282.40), GP R8 (+\$458.00), BEL R3 (-\$126.60).

Added Plays: MTH R5 (+\$93.90), MTH R6 (-\$136.40), MTH R7 (-\$186.40), MTH R8 (-\$272.00), SA R4 (-\$100.90), SA R5 (+\$373.60), SA R9 (-\$272.00), SA R11 (-\$222.00), SA R12 (-\$222.00).

The high-conviction picks — doubled stakes, vulnerability thesis confirmed, multiple signals firing, full analytical depth — returned **+65% ROI**. The added plays, selected with less rigor and lower conviction, went 1-for-9 and bled nearly a thousand dollars.

The insight: the filter IS the product. The Commission Card's value isn't more picks — it's fewer, better picks. Full Phase 1-5 analysis with conviction thresholds produces a fundamentally different outcome than ceiling-math-plus-a-thesis. More races does not mean more profit. It means more exposure to situations where the edge is thinner.

Going forward: the Commission Card stays tight. 5–8 high-conviction plays per day maximum. Races that clear every gate — signals, vulnerability, pace thesis, ceiling alignment, value odds. The added plays are for fun, tracked separately, and *never* presented to members as Commission picks.

Scratch Response Analysis

Four races on our card were impacted by scratches. The model produced revised bets for all four. Mike had to decide in real-time whether to place the revised bet or sit out. **He made the right call once, the wrong call three times.**

The Four Cases

Scratch Impact	Win Pick Status	Correct Action	Why
Minor	Alive	BET	Thesis unchanged. Box is mechanical — any horse can fill a ceiling slot.
Significant	Alive	BET	Volume of scratches ≠ thesis damage. Check if pace/setup still favors your pick. Often it improves.
Critical	Gone	DROP	The thesis IS the win pick. No rebuild recreates the original conviction.

1. GP R8 — Minor scratch (Jokes Up, 4th ceiling horse)

Impact: MINOR · **Win pick status:** Alive · **Mike's call:** DROPPED (WRONG)

Result: Vindicate Cha Cha wired the field at 15/1. Win bet would have returned \$680. Exotics missed (PP5 ran 2nd, not in box). **Net missed: +\$458.**

Why this was wrong: The thesis was “this is the fastest horse in the race and nobody is betting her.” That thesis didn't change when Jokes Up scratched. Jokes Up was mechanical box filler — her absence didn't affect why we were in the race. The most painful drop of the day: a 15/1 winner the model identified correctly, sitting right there, unbacked.

2. LRL R3 — Minor scratch (Cactus, 4th ceiling horse)

Impact: MINOR · **Win pick status:** Alive · **Mike's call:** DROPPED (WRONG)

Result: Bushido won. Win bet would have returned \$250. Exotics missed (PP5 ran 2nd, not in box). **Net missed: +\$63.60.**

Why this was wrong: Identical situation to GP R8. Win pick alive, thesis alive, box horse replaced with a stronger ceiling horse. The model even flagged it as an upgrade. Mike applied a blanket “scratch = don't bet” rule that doesn't distinguish between losing your thesis and losing box filler.

3. BEL R9 — Significant scratch (Brigadier General + Determinedly)

Impact: SIGNIFICANT · **Win pick status:** Alive · **Mike's call:** DROPPED (WRONG)

Result: Frosted Over didn't win, but the rebuilt box (8-4-5-1-2) nailed the exacta and trifecta. Collected \$504.40 on \$222. **Net missed: +\$282.40.**

Why this was wrong: “Significant” sounds scary. But the model correctly identified that losing speed horses made our stalker BETTER positioned. The ceiling box rebuild was mechanical and correct — the new top 5 included the actual top 3 finishers. Mike confused volume of scratches with impact on thesis.

4. LRL R7 — Critical scratch (Niche, the win pick)

Impact: CRITICAL · **Win pick status:** Gone · **Mike's call:** DROPPED (RIGHT)

Result: The rebuild would have been a full –\$222 loss. The model's rebuild was pure ceiling math without conviction. **\$222 saved.**

Why this was right: Niche wasn't just the best horse by Beyer — he was the STORY. When that horse scratches, you don't have a second version of that thesis. You have a different, weaker bet masquerading as continuity. The model will always produce a rebuild. The human's job is to recognize when the rebuild is a shadow of the original conviction.

The numbers

Scenario	Mike's Action	vs. Model
GP R8 (dropped)	\$0	Missed +\$458
LRL R3 (dropped)	\$0	Missed +\$63.60
BEL R9 (dropped)	\$0	Missed +\$282.40
LRL R7 (dropped)	\$0	Avoided –\$222

Mike's actual P/L on scratch races: \$0

If Mike followed the rule on all four: +\$458 + \$63.60 + \$282.40 – \$0 (dropped R7 correctly) = +\$804

Net cost of blanket sit-out policy: \$582

The lesson

Mike dropped every scratch race. He applied one rule to four situations that required two different responses. The fix is a single question: **Is my win pick still running?**

Yes → Bet. Full stop. The thesis is alive.

No → Drop. The thesis died with the horse.

GP R8 is the day's defining miss. Vindicate Cha Cha at 15/1 — the model's highest-conviction pick, lone speed in a sprint, best last Beyer by 3 points, La Cosa Nostra firing. She wired exactly as predicted. The only thing that changed was a box horse nobody cared about. Mike watched a \$680 win bet cash from the sideline.

What we're changing: the scratch monitor

Going forward the scratch monitor delivers a **decision** — not a report.

Non-consequential scratch (win pick alive): Email says: what scratched and why it doesn't matter · the word **NON-CONSEQUENTIAL** · the full revised bet ticket · clear instruction: **PLACE REVISED BET.**

Consequential scratch (win pick gone): Email says: what scratched · the word **CONSEQUENTIAL** · clear instruction: **RACE DROPPED — NO BET.** No analysis. No options. The model assessed. The

email delivers. The member executes.

Winning Races (4)

BEL R7 — Momentum Files (PP1) | 7f Dirt

Result	Our Bet	Wagered	Collected	Net
1-MOMENTUM FILES, 4-TOGA D'ORO, 5-SALMING	Win #1 Momentum Files (\$100 doubled) Box: 1, 5, 4, 6	+\$646.09	\$832.49	+\$646.09

What worked: Ceiling box dominated — top 3 finishers were the top 3 Beyer ceilings (99, 96, 94). Pace thesis nailed: Momentum Files broke cleanly on the rail; Moment's Notice (5/2 fave, 91 ceiling) was outclassed by 8 points. La Cosa Nostra firing at 6/1, won at 9.56/1 — extra value captured.

Strategies validated: Beyer Ceiling Box (1-2-3 by ceiling), La Cosa Nostra, Spot the Vulnerable Fave.

GP R8 — Vindicate Cha Cha (PP9) | 5.5f Dirt

Result	Our Bet	Wagered	Collected	Net
9-VINDICATE CHA CHA, 5-GREENFIELD COUGAR, 7-GREAT VENEZUELA	Win #9 Vindicate Cha Cha (\$50) Box: 7, 9, 6, 8, 4	+\$458.00	\$680.00	+\$458.00

What worked: Best ceiling in the field (105). Lone E-type in a sprint — no pace duel, classic wire job. 15/1 ML with the best last Beyer (105) in the field. S6 firing hard, style/distance fit perfect.

Strategies validated: Beyer Ceiling Box, La Cosa Nostra, S6, Pace Makes the Race.

Lesson: Scratch note: This was a scratch-affected race (Jokes Up scratched). Mike dropped it. Win pick alive = should have bet. See scratch analysis above.

LRL R3 — Bushido (PP3) | 5.5f Turf

Result	Our Bet	Wagered	Collected	Net
3-BUSHIDO, 5-WAR HUMOR, 4-BIG TANKNESS	Win #3 Bushido (\$100 doubled) Box: 3, 1, 6, 4	+\$63.60	\$250.00	+\$63.60

What worked: Highest ceiling (105) at 7/2. Vulnerability thesis correct — Big Tankness (E/P, fave) got cooked to 3rd. Box caught the 1-3 but War Humor (PP5, 99 ceiling, 12/1) ran 2nd and was NOT in the box.

Strategies validated: La Cosa Nostra, Spot the Vulnerable Fave.

Lesson: Miss within the win: War Humor (99 ceiling, same as his last) should have been in the box over Bouncer (97 ceiling). Box construction error cost the exacta (\$14.15 base × \$5 = \$70.75 missed).

SA R5 — Tahini (PP4) | 6f Turf

Result	Our Bet	Wagered	Collected	Net
4-TAHINI, 5-CAN'T SLEEP, 6-KUWAITYA	Win #4 Tahini (\$50) Box: 4, 3, 1, 6, 5	+\$373.60	\$595.60	+\$373.60

What worked: Tahini had the best ceiling (103) AND best last Beyer (103) — S6 firing. 5-horse expanded box caught the exacta (4-5) and trifecta (4-5-6). Top 3 finishers were the top 3 Beyer ceilings in order. Won at 17.2/1 — massive overlay on the class horse.

Strategies validated: Beyer Ceiling Box (ceiling = finishing order), S6, La Cosa Nostra.

Losing Races (12)

BEL R3 — Egyptian (PP1) wins | 1 Mile Dirt

Result	Our Bet	Wagered	Collected	Net
1-EGYPTIAN, 6-SOLO JIM, 7-COME FULL CIRCLE	Win #5 Drop Me A Dime (\$100 doubled) Box: 5,1,6,4	\$186.40	\$59.80	-\$126.60

What happened: Egyptian (PP1, E, 8/5 fave) wired on the rail. Our counter-speed Drop Me A Dime (PP5, E, 15/1) couldn't engage. Exacta 1-6 hit (\$59.80). The fave was inside lone speed — effectively PROTECTED, not vulnerable.

Lesson: “Two E horses” is necessary but not sufficient for a pace duel. The INSIDE E horse (rail, PP1) breaks to the lead without effort; the outside E (PP5) must use energy to engage. In a 7-horse field at 1 mile, outside speed may never pressure the rail. Rule update: 2E only = pace duel IF one is drawn inside the other OR field size forces engagement.

BEL R5 — Hard Circle (PP7) wins | 1 Mile Turf

Result	Our Bet	Wagered	Collected	Net
7-HARD CIRCLE, 1-ROYAL BROWNE, 2-TAKE A STANCE	Win #3 Hong Kong Phooey (\$100 doubled) Box: 7,3,2,4	\$186.40	\$0	-\$186.40

What happened: Hard Circle (101 ceiling, 3/1 ML fave) was the best horse and won. We couldn't bet him to win (Rule: never bet the fave), so we bet Hong Kong Phooey (97 ceiling, 15/1) instead. Royal Browne (91 ceiling, 6/1, PP1, P-type) ran 2nd — not in our box.

Lesson: Structural loss — the model accepts it when the fave is genuinely the best horse. But the exotic miss is the real learning: Royal Browne (6/1, PP1 presser on turf at 1 mile) is exactly the Inside E/P Turf Expander profile. She should have been added to the tri/super. Rule exists for this scenario — apply it.

LRL R7 — Hark TheAngelsSing wins | 5.5f Turf

Result	Our Bet	Wagered	Collected	Net
8-HARK THEANGELSSING, 11-GERRARDS CROSS, 3-TAP INTO GRACE	Win #6 Just Philtored (\$50) Box: 6,9,10,11,2	\$222.00	\$0	-\$222.00

What happened: Scratch-affected race (Niche scratched — Mike correctly dropped). A closer won a 5.5f turf sprint, defying the Sprint Closer Penalty. Tap Into Grace (10/1 → 6/1 live — S2 firing) was not in our box.

Lesson: R9 (Sprint Closer Penalty) is DIRT-specific. On turf, closers remain eligible in 5.5f+ sprints if a pace duel exists (2+ E types). Also: S2 on Tap Into Grace (late tote action, 10/1 → 6/1) should have triggered box expansion.

MTH R6 — Princess Gladys wins | 1 Mile Turf

Result	Our Bet	Wagered	Collected	Net
7-PRINCESS GLADYS, 4-EXCLUSIVE CHAMPION, 3-WOW LUCKY	Win #2 Celestial Express (\$50) Box: 2,6,7,5	\$136.40	\$0	-\$136.40

What happened: Princess Gladys (90 ceiling, 3/1 co-fave) won. We bet Celestial Express (84 ceiling) — a horse 6+ points below the ceiling leaders. In a weak field where all top-ceiling horses are chalk, there's no legitimate fade.

Lesson: When the top Beyer ceilings are all short-priced favorites AND the gap to value horses is 6+ points, consider no-play. The R8 Beyer Ceiling Gap rule should have halved or killed the win stake here.

MTH R7 — Elsie's Smile wins | 6f Dirt

Result	Our Bet	Wagered	Collected	Net
5-ELSIE'S SMILE, 2-NO DENYING, 7-CASSIE'S VAULT	Win #7 Cassie's Vault (\$100 doubled) Box: 7,4,3,5	\$186.40	\$0	-\$186.40

What happened: Elsie's Smile (5/2 fave, 93 ceiling, 92 last Beyer — near peak form) won. Our pick Cassie's Vault (96 ceiling, 90 last — 6 points off best) was the ceiling leader on stale form. No Denying (93 ceiling, 6/1, E) ran 2nd and was NOT in our box.

Lesson: Ceiling Freshness: Cassie's Vault (96 ceiling / 90 last = 6 pts stale) lost to Elsie's Smile (93 / 92 = 1 pt fresh). Fresh form beats stale ceiling. Proposed modifier: within 3 pts = LIVE; 4–7 pts = FADING; 8+ pts = STALE, reduce stake; 15+ pts = DEAD, exclude from box.

MTH R8 — Red Sky Morning wins | 8.5f Turf

Result	Our Bet	Wagered	Collected	Net
10-RED SKY MORNING, 4-ROSCOMMON, 1-REDEMPTION SPEIGHT	Win #3 First Navy Jack (\$100 doubled) Box: 3,9,1,6,2	\$272.00	\$0	-\$272.00

What happened: Red Sky Morning (81 ceiling, 7/2) and Roscommon (75 ceiling, 4/1) ran 1-2. Two low-ceiling horses dominated. First Navy Jack (99 ceiling, 15/1, Irish import) had null comparable data at Monmouth on turf and ran nowhere.

Lesson: At minor-track turf routes (\$20K and under), Beyer ceilings earned at other tracks or on dirt are unreliable. Local connections (Dini/Lopez) and track familiarity outweigh imported figures. Rule: at low-purse turf routes at minor tracks, weight last Beyer at THIS track over career best anywhere.

SA R4 — Clever Clover wins | 6f Dirt

Result	Our Bet	Wagered	Collected	Net
3-CLEVER CLOVER, 6-DES DOIGTS, 5-KAHUNA MAGIC	Win #6 Des Doigts (\$100 doubled) Box: 3,6,1,2	\$186.40	\$85.50	-\$100.90

What happened: Clever Clover (PP3, E/P, 96 ceiling) won; Des Doigts (PP6, E, 98 ceiling, our pick) ran 2nd. Exacta 3-6 hit (\$85.50). Clever Clover had the inside position (PP3 vs PP6) and E/P style — drafted while Des Doigts burned energy from outside.

Lesson: When two high-ceiling horses are 1–2 points apart, POST POSITION becomes the tiebreaker in dirt sprints. Inside E/P over outside E. 2-point ceiling edge was erased by positional disadvantage (PP6 vs PP3).

SA R9 — Gold Phoenix wins | 14f Turf (Grade 3)

Result	Our Bet	Wagered	Collected	Net
6-GOLD PHOENIX, 9-GOLDENEYE, 4-AMERICAN HOPE	Win #10 Poor Connection (\$100 doubled) Box: 10,4,5,7,6	\$272.00	\$0	-\$272.00

What happened: Gold Phoenix (7/5 live fave, 83 ceiling) won a 14-furlong marathon by class. Our pick Poor Connection (99 ceiling, 15/1) earned that figure at shorter distances — at 14f it was irrelevant. The market told us everything: Gold Phoenix went from no ML to 7/5 live.

Lesson: At 12f+ turf, the Beyer Ceiling Box breaks. Speed figures earned at shorter distances don't measure stamina. Rule: at 12f+ turf, only compare Beyers earned at 10f+. If no comparable exists, use trainer/pedigree/class as primary rank.

SA R11 — Canto Della Terra wins | 6.5f Turf

Result	Our Bet	Wagered	Collected	Net
9-CANTO DELLA TERRA, 7-SWEET GAL OF MINE, 6-NO CAP	Win #3 Mars Magic (\$50) Box: 6,4,3,9,1	\$222.00	\$0	-\$222.00

What happened: Sweet Gal of Mine (PP7, E/P, 97 ceiling, 9/2) ran 2nd but was NOT in our box. The box selected Canto Della Terra (91 ceiling) and Kikuride (92 ceiling) over Sweet Gal (97) — a box construction error.

Lesson: Mechanical box error: Sweet Gal of Mine (97) should have been in the box over Canto (91) and Kikuride (92). The box = top N by ceiling. No signal score or style should override the ceiling ranking for box construction. Audit every box against a strict ceiling sort.

SA R12 — The Old Nine wins | 6f Turf

Result	Our Bet	Wagered	Collected	Net
3-THE OLD NINE, 2-TIZ ALL THAT, 11-VALIANT SON	Win #6 Private Gem (\$50) Box: 10,6,3,7,8	\$222.00	\$0	-\$222.00

What happened: Private Gem (our win pick) went off at 2/1 live — she was the FAVORITE. Rule violation: never bet the favorite to win. Tiz All That (94 ceiling) and Valiant Son (95 ceiling) ran 2nd and 3rd but were NOT in the box; King Stephen (92 ceiling) was in box over them. Box construction error.

Lesson: Three failures stacked: (1) win pick was the live favorite — win bet should have been cancelled at post, (2) box excluded 94- and 95-ceiling horses in favor of a 92, (3) ceiling leader Golden Ale (104) ran out of it at 11/1 — when the ceiling leader is double-digit odds, investigate WHY before boxing.

MTH R5 — Grouch wins (exotics hit) | 6f Dirt

Result	Our Bet	Wagered	Collected	Net
1-GROUCH, 6-NATURAL HARBOR, 5-LORD BERRIER	Win #5 Lord Berrier (\$50) Box: 1,6,5,7	\$136.40	\$230.30	+\$93.90

What happened: Grouch (9/5 live fave) won; Lord Berrier (our pick, 96 ceiling, 74 last Beyer) ran 3rd. All 3 finishers were in our box — trifecta hit (+\$93.90). Lord Berrier's ceiling (96) was 22 points above his last Beyer (74) — stale form.

Lesson: Ceiling Freshness again: Lord Berrier (96 best / 74 last = 22-point gap) is the textbook dead ceiling. Grouch (93 best / 85 last = 8-point gap, much fresher) won. A 22-point gap should have excluded Lord Berrier from win contention entirely under the proposed freshness modifier (15+ pts = DEAD ceiling).

MTH R6, MTH R7, MTH R8 — referenced above

Result	Our Bet	Wagered	Collected	Net
See detailed race analysis above				—

What happened: All three Monmouth losses covered in the losing race sections above.

Lesson:

Patterns and Lessons

Theme 1 — Stale Ceilings (5 races affected)

The Beyer Ceiling Box works brilliantly when horses are NEAR their career bests. It fails when the ceiling is old and the horse hasn't shown that form in months.

Affected races: MTH R7 (Cassie's Vault 96/90), MTH R8 (First Navy Jack 99/84, Chaos Comin 97/73), BEL R9 (Frosted Over 98/81), MTH R5 (Lord Berrier 96/74).

Proposed Ceiling Freshness modifier:

Gap (Best vs. Last Beyer)	Status	Action
Within 3 points	LIVE ceiling	Full confidence
4–7 points	FADING ceiling	Moderate confidence
8–14 points	STALE ceiling	Low confidence — reduce stake
15+ points	DEAD ceiling	Exclude from box (unless signals override)

Theme 2 — Box Construction Errors (3 races)

In multiple races, lower-ceiling horses were boxed over higher-ceiling horses, violating the mechanical rule.

Affected races: LRL R3 (War Humor 99 excluded), SA R11 (Sweet Gal of Mine 97 excluded), SA R12 (Tiz All That 94, Valiant Son 95 excluded).

Fix: audit every box against a strict ceiling sort. No signal score or running style should override the ceiling ranking for BOX construction (signals can influence the WIN PICK, but the box is pure math). The box = top N by ceiling. Period.

Theme 3 — Favorite Wins (4 races)

Affected races: BEL R3 (Egyptian 8/5), MTH R6 (Princess Gladys 3/1), MTH R7 (Elsie's Smile 5/2), MTH R5 (Grouch 9/5). These were all favorites with fresh form (last Beyer near ceiling). No rule change needed — this is the model's accepted cost. 67% of favorites lose; we play for that edge. The exotics captured value in most of these (Grouch: exacta + trifecta hit).

Theme 4 — Surface / Distance Breaks the Model (2 races)

Affected races: SA R9 (14f marathon), MTH R8 (low-purse turf route). At extreme distances and minor-track turf, Beyer ceilings earned elsewhere don't transfer.

Fix: at 12f+ turf, only compare Beyers earned at 10f+. At minor-track turf routes (\$20K and under), weight last Beyer at THIS track over career best anywhere. If no valid comparable exists, treat as unranked.

Theme 5 — Sprint Closer Penalty Needs Surface Modifier

Affected race: LRL R7 (closer won 5.5f turf sprint in a pace duel). R9 correctly penalizes closers in DIRT sprints, but turf sprints with hot pace play differently.

Fix: R9 applies to dirt sprints only. On turf, closers remain eligible in 5.5f+ sprints IF a pace duel exists (2+ E types).

Lifetime Record (updated)

Date	Track	Races	W-L	Wagered	Coll.	P/L	ROI
2026-05-24	Churchill Downs	6	2-4	\$554	\$611.40	+\$57.40	+10.4%
2026-06-06	Saratoga (Belmont Day)	12	3-9	\$1,564	\$2,434	+\$870	+56%
2026-06-07	Saratoga	6	2-4	\$904	\$1,339.75	+\$435.75	+48%
2026-06-11	Multi-track	5	0-5	\$788	\$221.30	-\$566.70	-71.9%
2026-06-13	Multi-track	5	1-4	\$532	\$184.00	-\$348.00	-65.4%
2026-06-14	Multi-track	16	4-12	\$3,267.20	\$3,238.09	-\$29.11	-0.9%
TOTAL		50	12-38	\$7,609.20	\$8,028.54	+\$419.34	+5.5%

Essentially break-even on the day. The model's analysis was correct on multiple races that missed due to execution gaps and rule violations. **Three consecutive days of minimal or negative ROI, but the underlying model accuracy (75% box hit rate) tells a better story than the P/L.**
